

THE COMPANION ROOM

A better place for muddy paws.

A considered resident pet spa for downtown East Lansing. Integrated washing and drying, essential supplies included, and two room footprints to evaluate.

2 + 1

INTEGRATED BAYS + PAW RINSE

Open the room tour

THE DEVELOPER DECISION

Two bays at opening. A plan for what follows.

A proposed amenity for one 300-500-unit East Lansing building, mostly studios, serving students and young professionals. The building floorplate and actual pet demand remain to be established.

Opening program

Two integrated wash/dry bays plus a separate low paw rinse. Resident use, compatible shampoo and towels included.

Preferred placement

Near a conditioned return route from outdoor pet access. Provide locked service storage and a separate finishing counter.

Space decision

Compact: 20 x 18 ft / 360 sq ft. Premium: 24 x 22 ft / 528 sq ft, with a reserved third-bay option.

Equipment basis: two Evolution mini units start at a published $24,500 before options, freight, tax and installation. **Construction:** quote required for both room options. The premium $120k-$220k total is an authored planning allowance, pending local validation.

Explore the room and compare both plans

01 / THE SPACE TRADEOFF

Two footprints. The same essential service.

	Compact	Premium + expansion
Illustrative envelope	20 x 18 ft	24 x 22 ft
Interior area	360 sq ft	528 sq ft
Opening program	2 wash/dry + 1 rinse	2 wash/dry + 1 rinse
Finishing counter	Compact	Separate counter
Reserved third bay	No reserved alcove	Space reserved
Retail niche	Omit or locate elsewhere	Optional built-in niche
Construction price	Quotation required	Quotation required

The compact option saves 168 square feet. Both are schematic fit studies. Equipment operation, accessibility, service panels and final circulation require review against the actual building and current supplier submittals. The rendered tour shows the premium room.

Recommendation: reserve the premium envelope if the floorplate supports it and expansion flexibility has value. Use the compact program where space is constrained, with a separate plan for higher demand.

02 / THE ROUTINE & CAPACITY

Keep the full wash-and-dry routine in one bay.

All current stills, tour views and browser geometry derive from the same detailed master scene. Equipment remains a generic reference concept.

Included: compatible shampoo, clean towels and used-towel return, waste bags, hooks and a phone shelf. Staff own checks, restocking and equipment service.

Four seasons: paw rinsing and entry cleanup after snow or mud; conditioned indoor washing, ventilation and towel turnover through the year.

Optional: a compact retail niche for brushes or take-home products. Supplier/service terms and fit-out are separate.

Capacity: two bays are the opening concept. At 400 apartments, 25% dog households and one bath/month, a 45-minute cycle models 100 washes/month. A concentrated 500-unit higher-demand case calls for three bays; the same case with 60-minute occupancy calls for four at the chosen 80% utilization ceiling. All inputs are assumptions. Quick-rinse traffic and queue behavior are excluded.

03 / THE COST EVIDENCE

Separate published prices from the room allowance.

$24,500

Published starting price for two Evolution mini integrated units, checked October 29, 2026. Options, freight, tax, installation, paw rinse and room construction are additional.

Supplier comparison

Groomer's Best lists two component tubs at $6,492 total; separate drying, dispensing and plumbing prevent a like-for-like comparison. APW and iClean alternatives require current quotations.

Construction evidence

A local contractor quotation has not been obtained. Compact construction stays unpriced. Compare complete bids using the same base-building assumptions.

Premium allowance snapshot	Low	High
Subtotal	$101,000	$182,000
20% concept contingency	$20,200	$36,400
Total authored allowance	$121,200	$218,400

The premium total includes the equipment allowance and overlaps the published equipment pair price; do not add them together. Excludes land, shell, tax, financing, structural work, major service relocation, third unit and retail fit-out. Reconcile permits, shared MEP and future provisions in bids.

Download the prepared supplier and construction pricing scope

04 / SOURCES & NEXT DECISIONS

Bring the concept to the project team.

Evolution mini - current price and included functions
Reference integrated equipment; supplier products affect warranty.

Evolution mini - linked March 2024 manual
Free Mode and 7 x 7 ft operating footprint. Obtain current submittals and connection details.

Groomer's Best - component tub benchmark
Published component price; not the full integrated scope.

All Paws TUB-Amenity
Free resident-use alternative; quotation required.

iClean XL - manufacturer catalog
Larger integrated alternative; confirm complete footprint and US support.

East Lansing - Building Information
Building and trade-permit pathways; project team establishes applicable submissions.

RESOLVE BEFORE COMMITMENT

- Confirm the actual floorplate and pet-return route.
- Approve equipment, free-use setup, access and service clearances.
- Coordinate water, drainage, ventilation, acoustics and electrical work.
- Set staff ownership, supplies, laundry and booking policy.
- Compare complete supplier and local construction quotations.

Concept 03 is prepared for discussion. Building facts are supplied by the user. No surveyed floorplate, approved equipment submittal or local contractor quote has been supplied. Visuals share one master scene and remain conceptual. Professional architectural and engineering design is required before construction. Research checked October 29, 2026.
